Emission Inventory System Reports Course

Sally Dombrowski

dombrowski.sally@epa.gov

919-541-3269

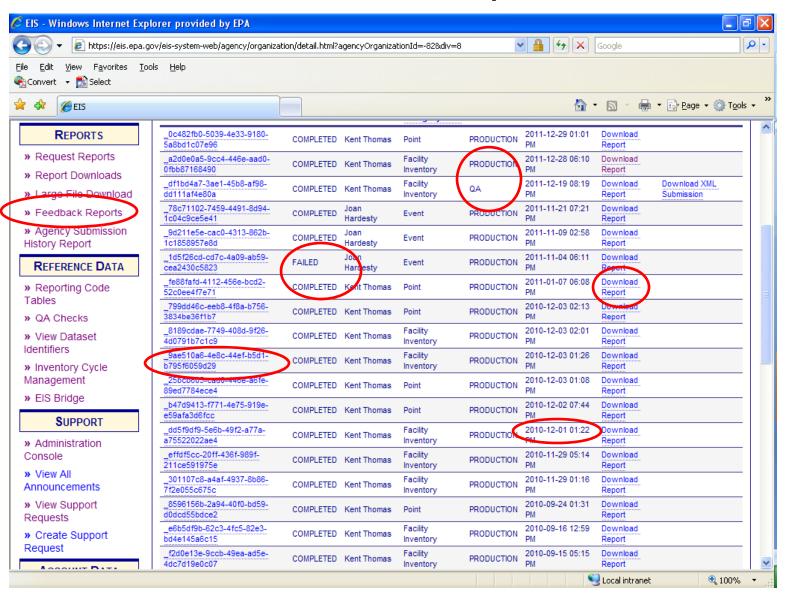

Types of Reports

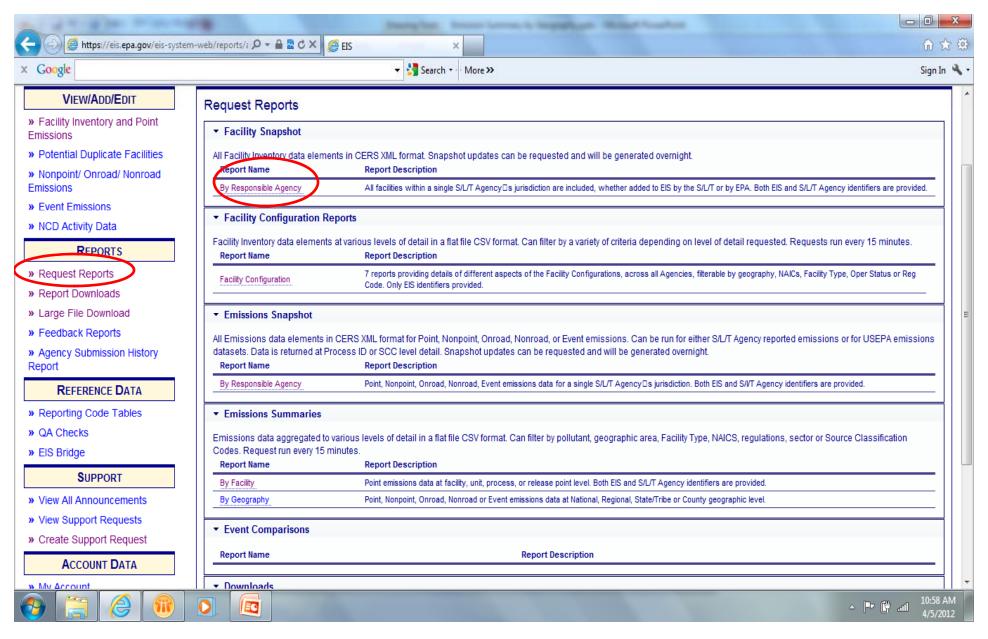

- Feedback Reports
 - First line of QA on your submission
- Snapshot
 - CERs xml format
 - Done separately for the various data categories
 - Requires use of the Bridge Tool to convert
 - Replica of the staging tables
 - Can only be run on a single agency emissions data set and not the general purpose release.
- Emissions Summaries
 - Summarized data at geographic or facility level
 - Can be run on both the responsible agency and the general purpose release.
- Agency Submission History Report
 - Excellent QA tool for point and nonpoint
 - Have you reported all of the facilities which you should report for?
 - Have you reported all of your SCCs for nonpoint
- Facility Configuration Reports
 - CSV format
 - Can be imported into Excel or Access as a text file
 - Flat files by Regulations, Process/Unit, Release Point, Facility, Alternative Identifiers and Controls
 - No emissions

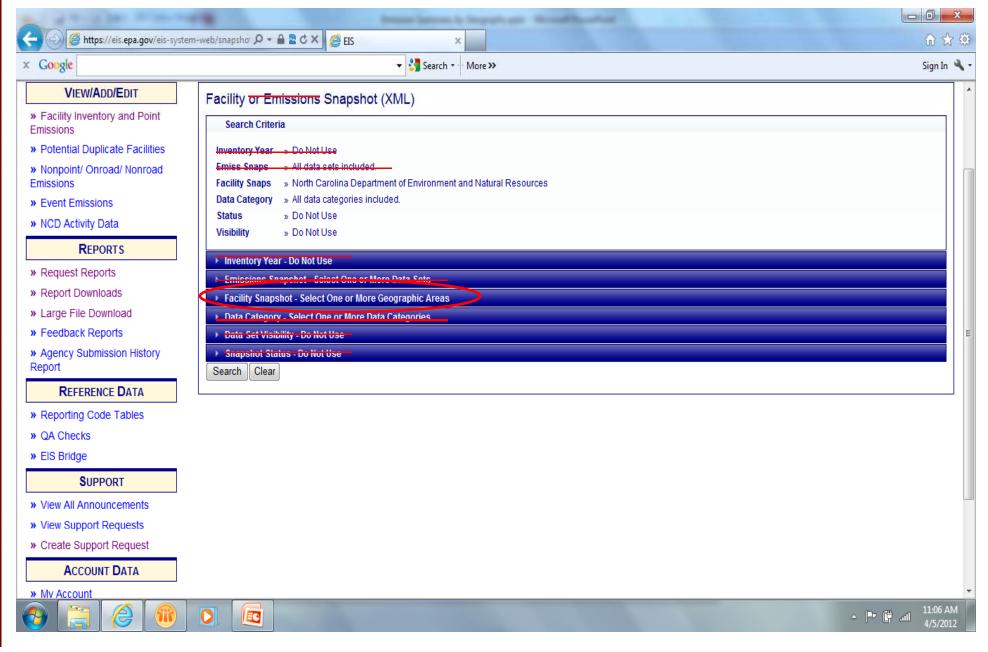

Feedback Reports

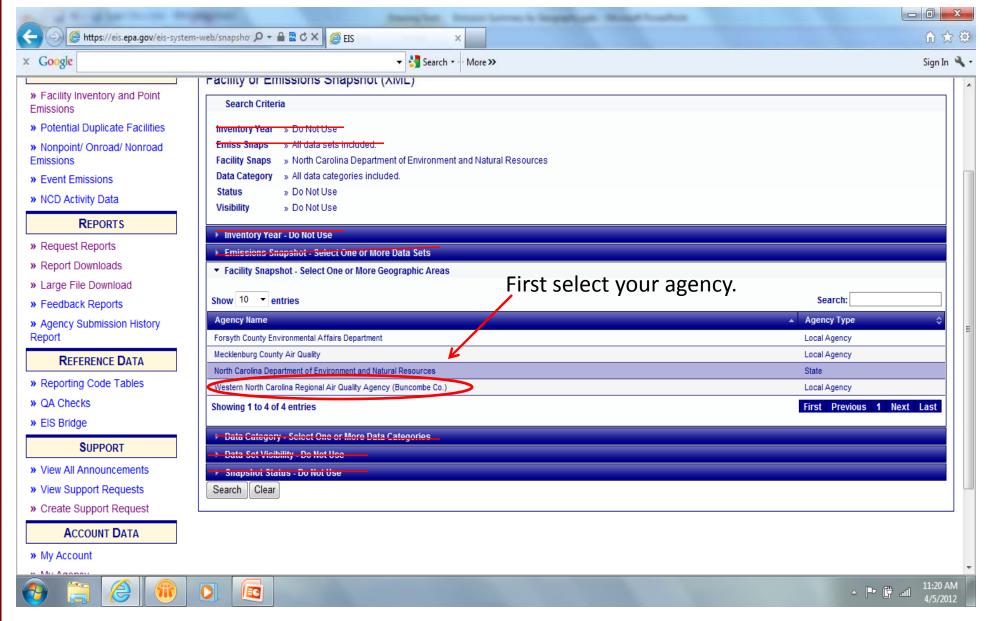

- QA and Production
- Statistics worksheet is very important to review
 - Do the number of records match the records you are submitting
 - Does the number of emission process match the number of reporting periods
 - Do you have a very large number of facility, unit and process changes when submitting a batch upload for the facility inventory
 - Recommend noting the number of records in each file and the CDX identifier when the file is submitted.
- Critical and Warning Errors
- Sample Feedback Report

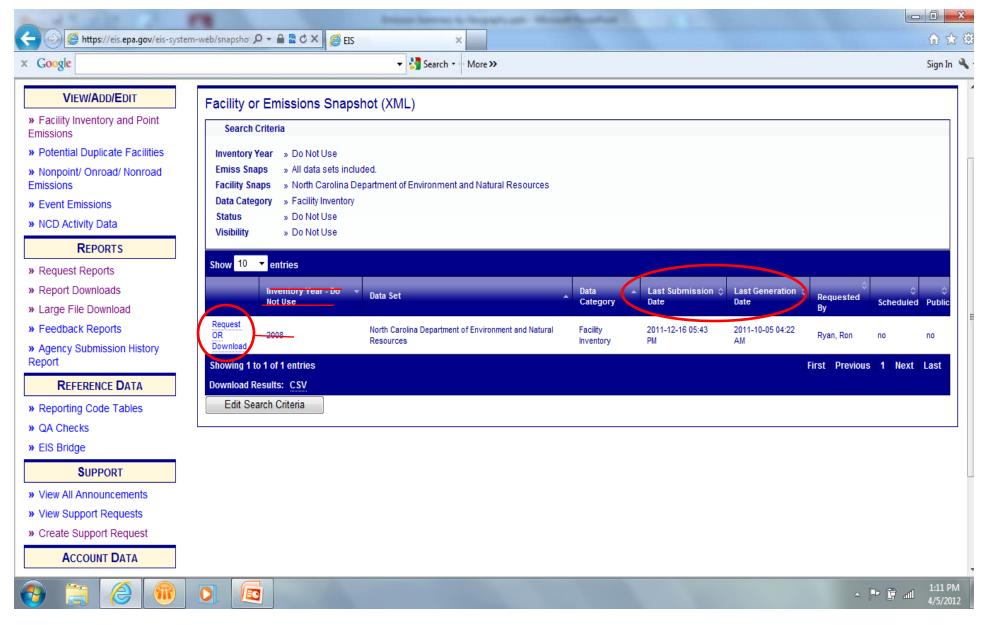

Feedback Reports

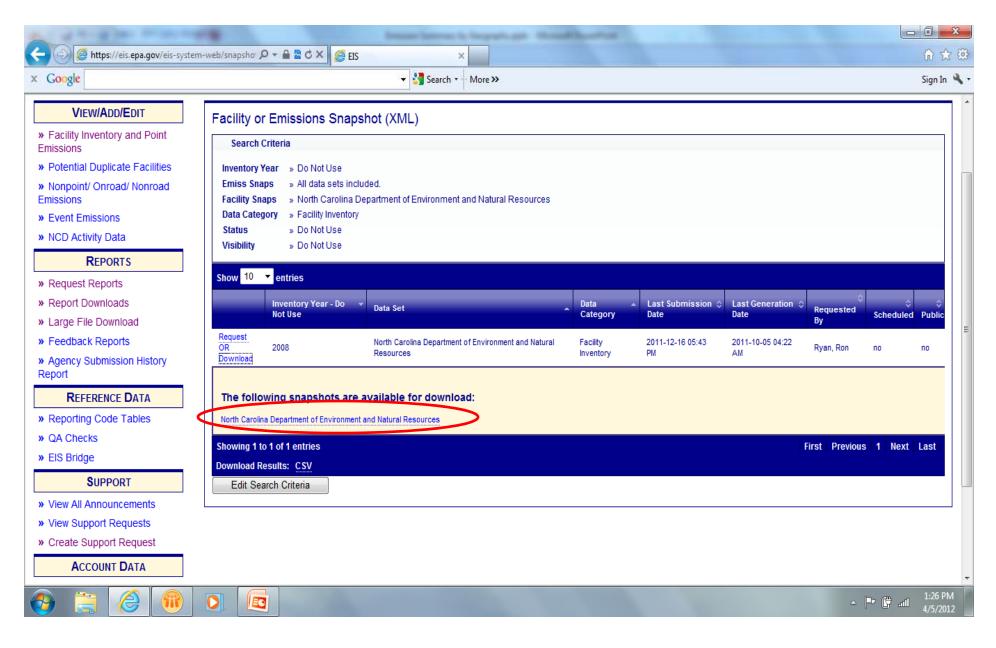

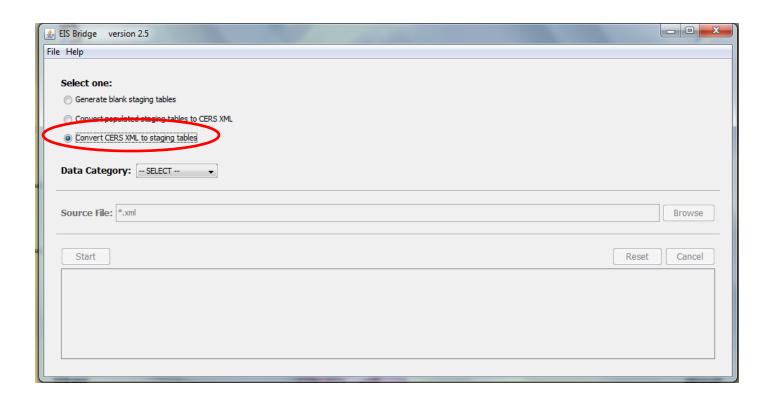

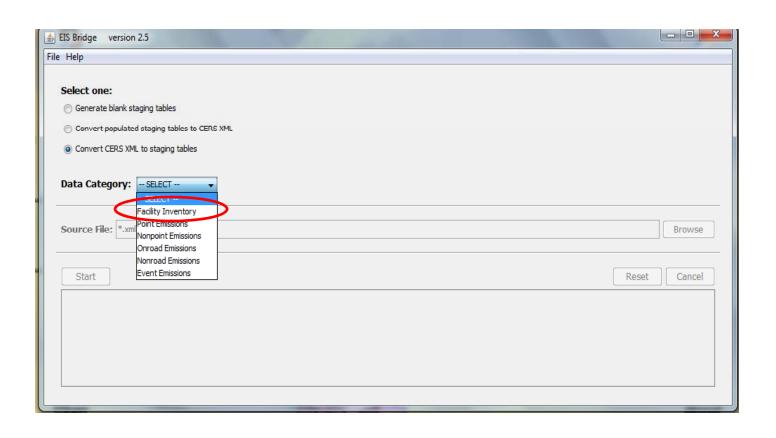

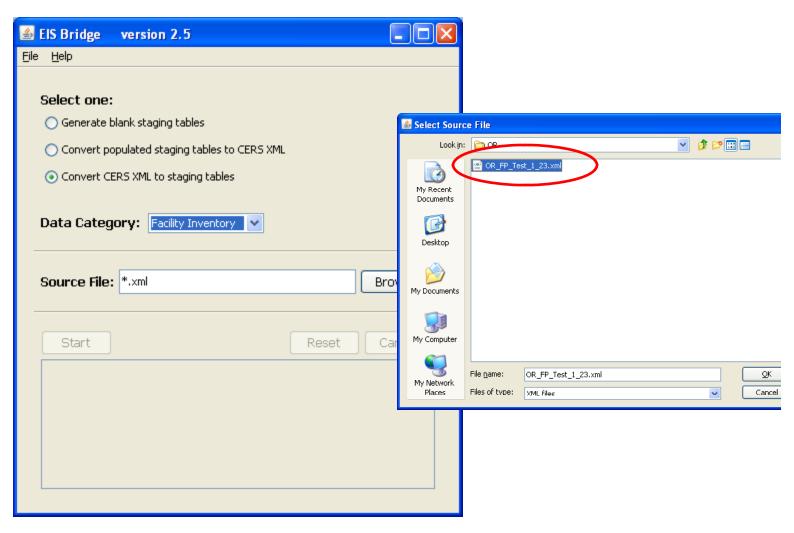

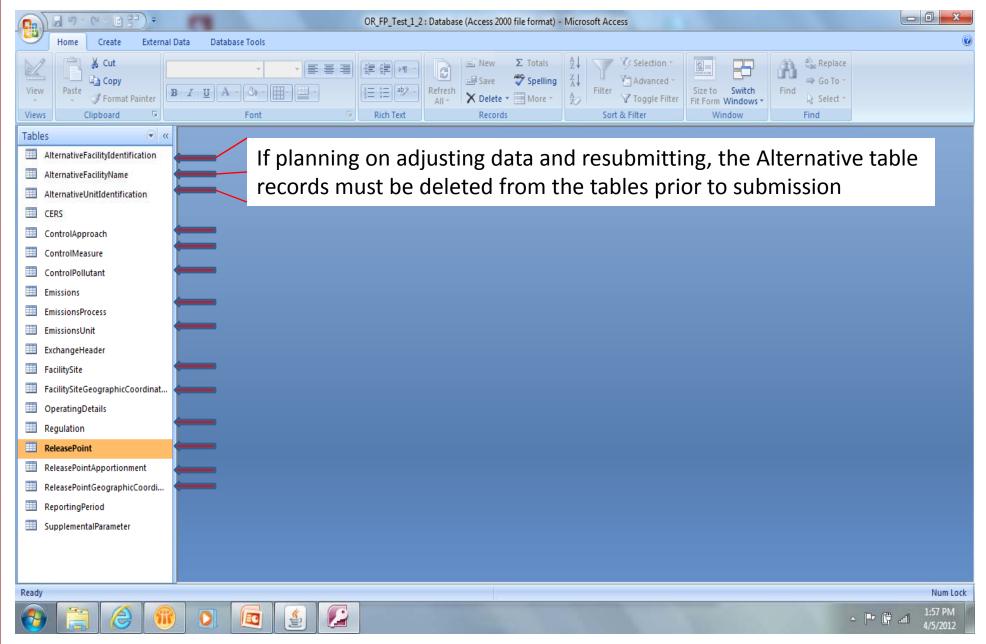

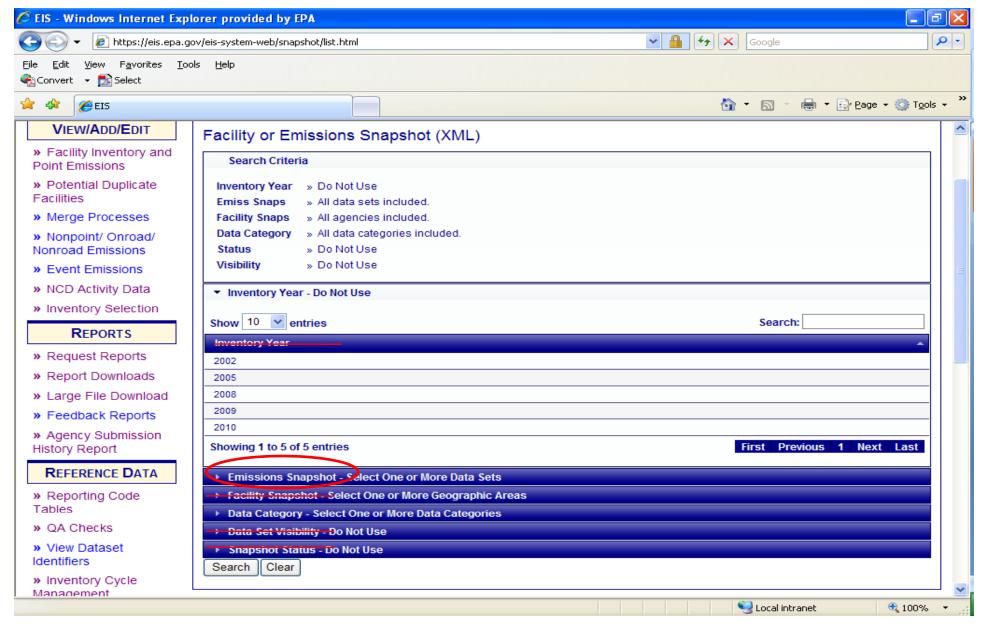

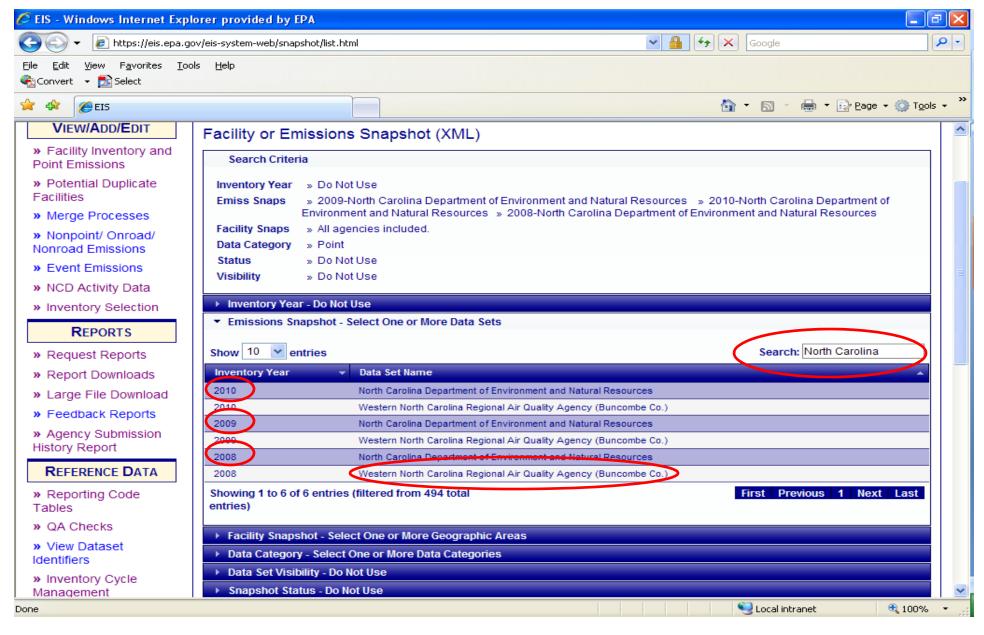

Staging Tables

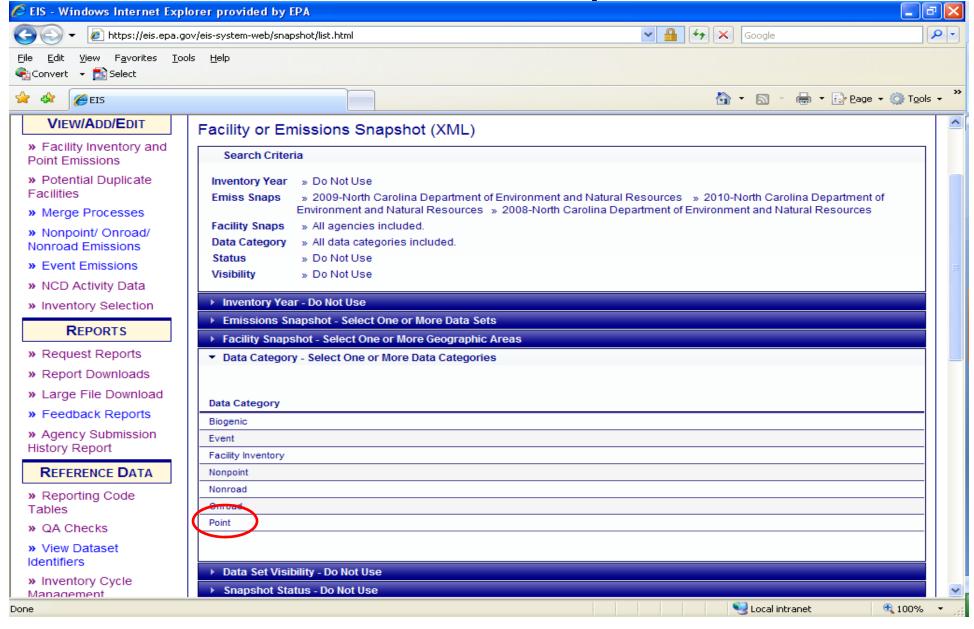

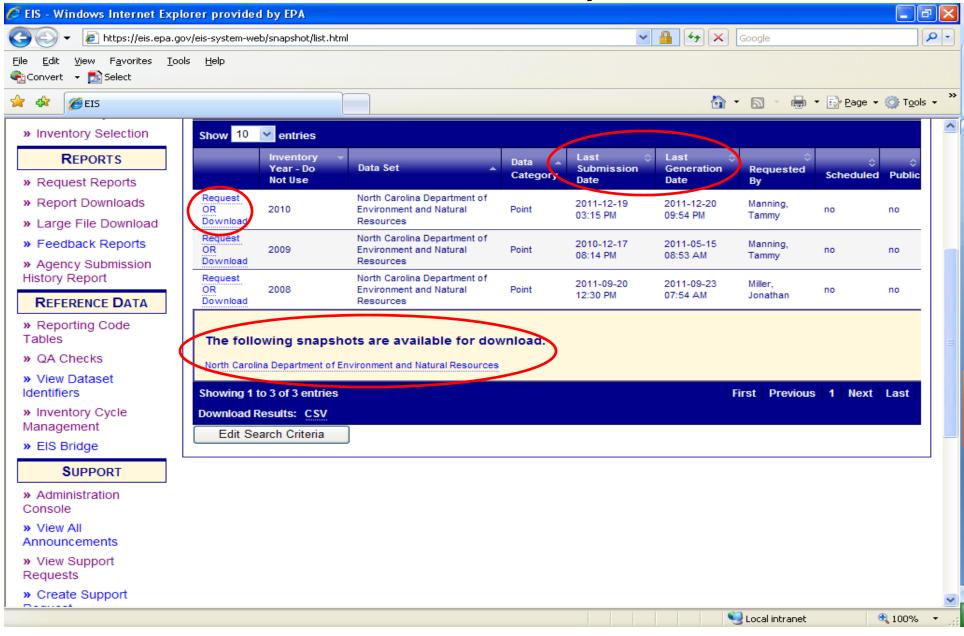

When would I want to use a facility snapshot?

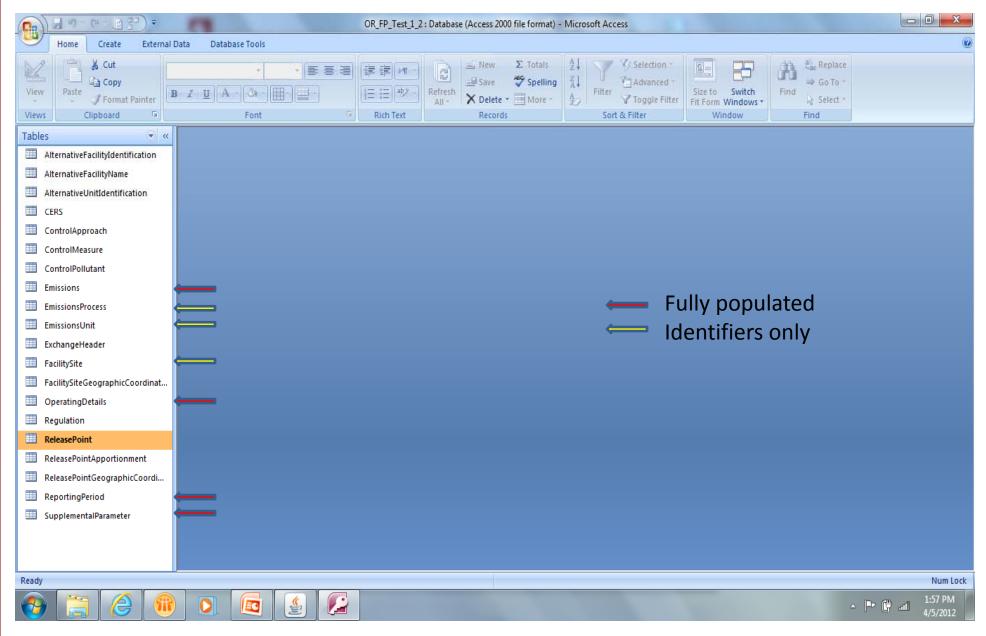

- Could be used to compare current EIS facilities, IDs, processes, controls, etc. to your updated Agency system version.
- Could be used to do a mass change of identifiers for facilities, units, processes and/or release points.

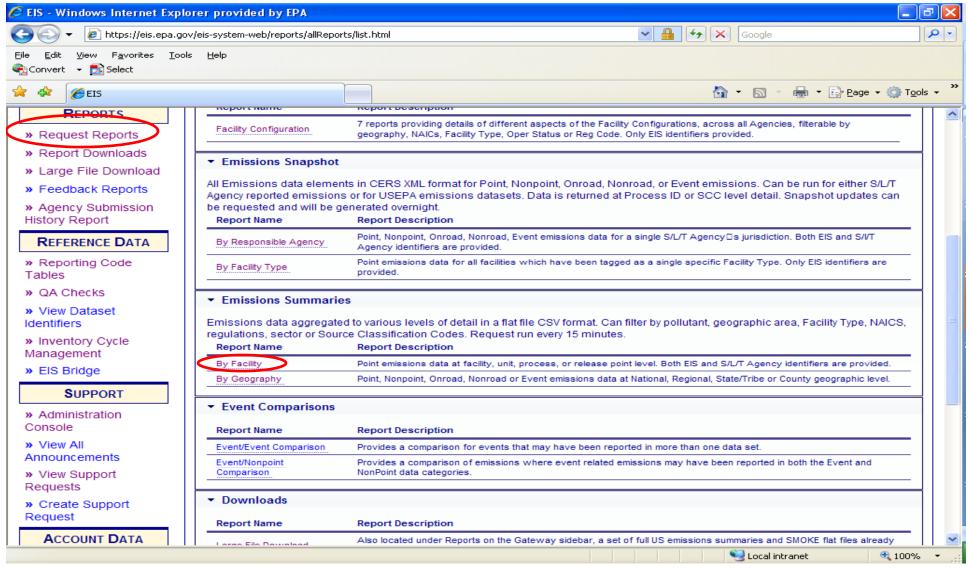

What can the Emissions Snapshot be used for?

- Could be used to submit emissions data by updating the Reporting Period and Emissions tables.
- Checking emission factors, throughputs and other fields that are not available in other reports
- Correcting a single pollutant and resubmitting the other pollutant emissions "as is"

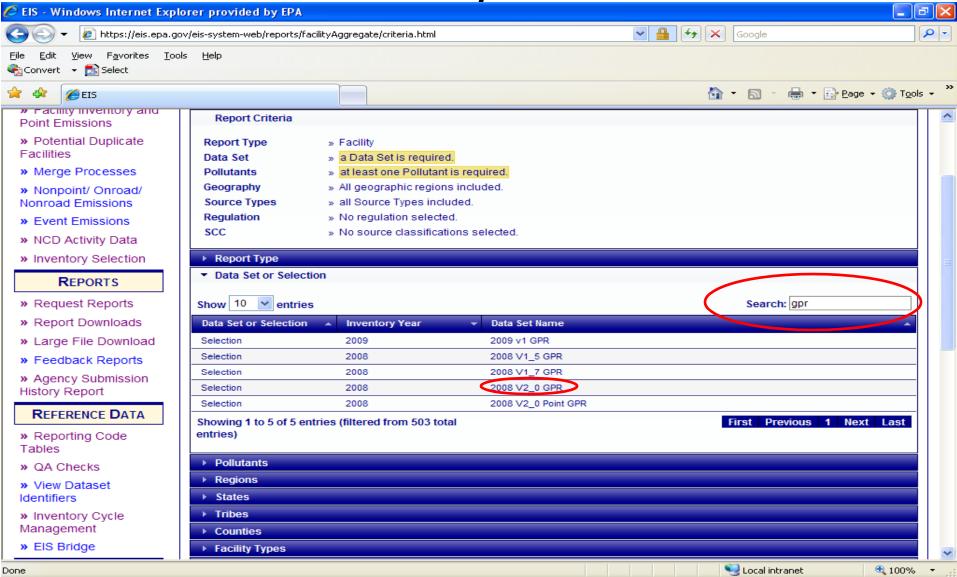

Emissions Summaries by Facility

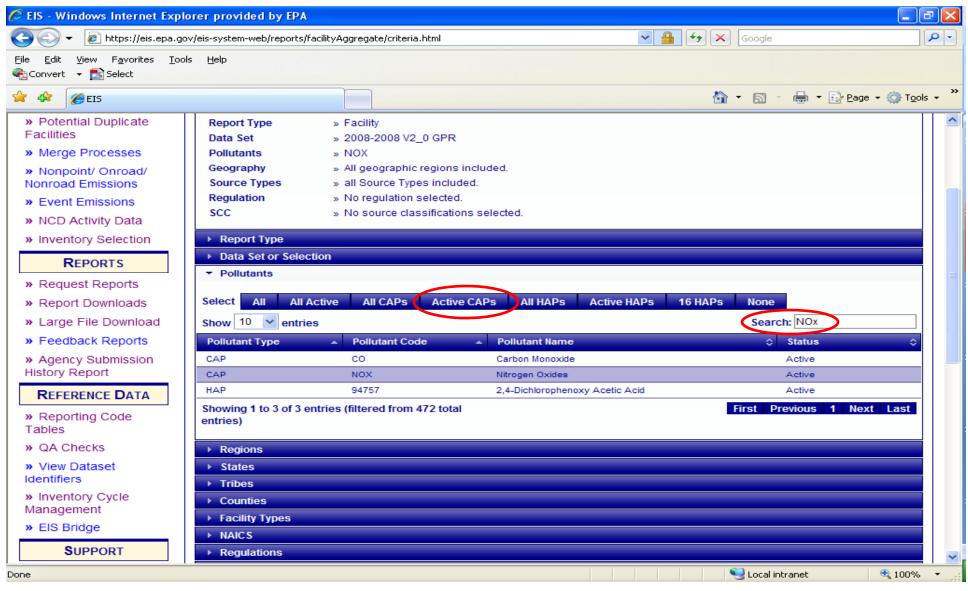

Emissions Summaries by Facility

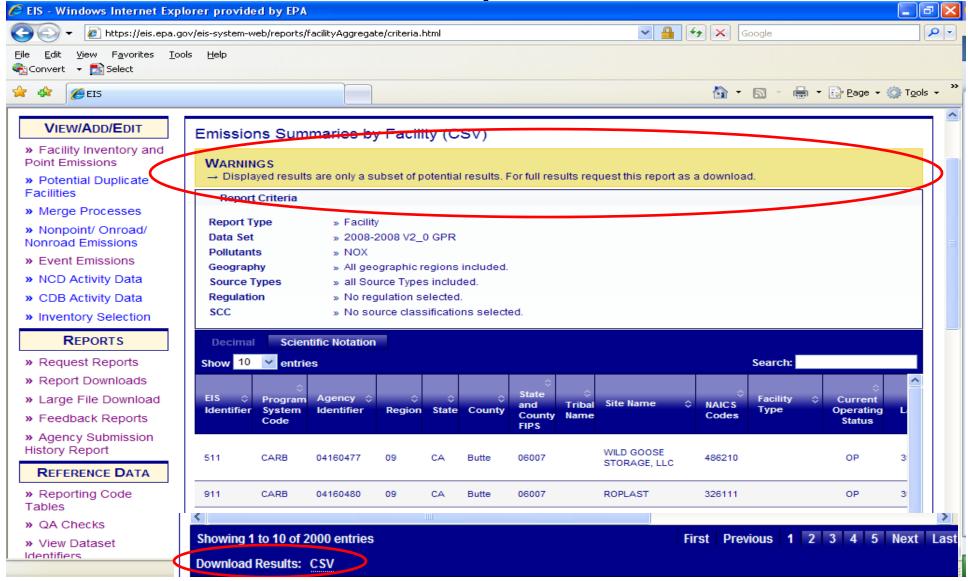

Emissions Summary by Facility
Facility Level

Emissions Summary by Facility Facility Level

Emissions Summary by Facility Facility Level

Emission Summary by Facility Facility Level

- EIS Facility Identifier
- Agency Facility Identifier
- Program System Code
- Region
- State
- County
- FIPS
- Tribal Code
- Tribal Name
- Facility Name
- NAICS Code
- NAICS Description
- Source Type
- Facility Site Operating Status
- Facility Status Year

- Latitude
- Longitude
- Address
- City
- State
- Zip Code
- Emissions Operating Type
- Pollutant Code
- Pollutant Description
- Total Emissions
- UOM

Emissions Summary by Facility Unit Level

- EIS Facility Identifier
- Agency Facility Identifier
- Program System Code
- Region
- State
- County
- FIPS
- Tribal Code
- Tribal Name
- Facility Name
- Address
- City
- State
- Zip Code
- NAICS Code
- NAICS Description
- Source Type

- Latitude
- Longitude
- EIS Unit Identifier
- Agency Unit Identifier
- Unit Program System Code
- Unit Type
- Unit Description
- Design Capacity
- Design Capacity UOM
- Emissions Unit Operating Status
- Unit Status Year
- Emissions Operating Type
- Pollutant Code
- Pollutant Description
- Total Emissions
- UOM

Emission Summary by Facility Process Level – Data Fields

- EIS Facility ID
- Agency Facility ID
- Agency Program System Code
- Region
- State Code
- County
- FIPS
- Tribal Code
- Tribal Name
- Facility name
- NAICS Code
- NAICS Description
- Source Type
- Latitude
- Longitude
- Address
- City
- State
- Zip Code
- EIS Unit ID
- Agency Unit ID
- Unit Type
- Unit Type Description

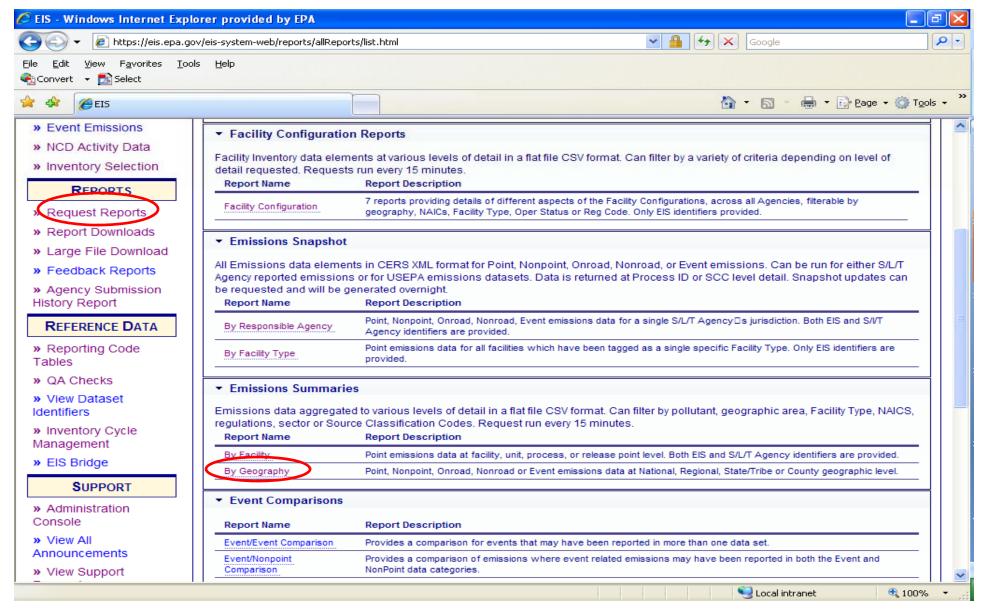

- EIS Process ID
- Agency Process ID
- SCC
- SCC Level 1
- SCC Level 2
- SCC Level 3
- SCC Level 4
- Emissions Type Code
- Aircraft Engine Type Code
- Aircraft Engine Type Code Description
- Unit Reg Code
- Process Reg Code
- Reg Code Description
- Emissions Operating Type Code
- Pollutant Code
- Pollutant Description
- Total Emissions
- UOM
- Data Set
- Emissions Calculation Method Code
- Emissions Comment

Emissions Summary by Facility Release Point Level

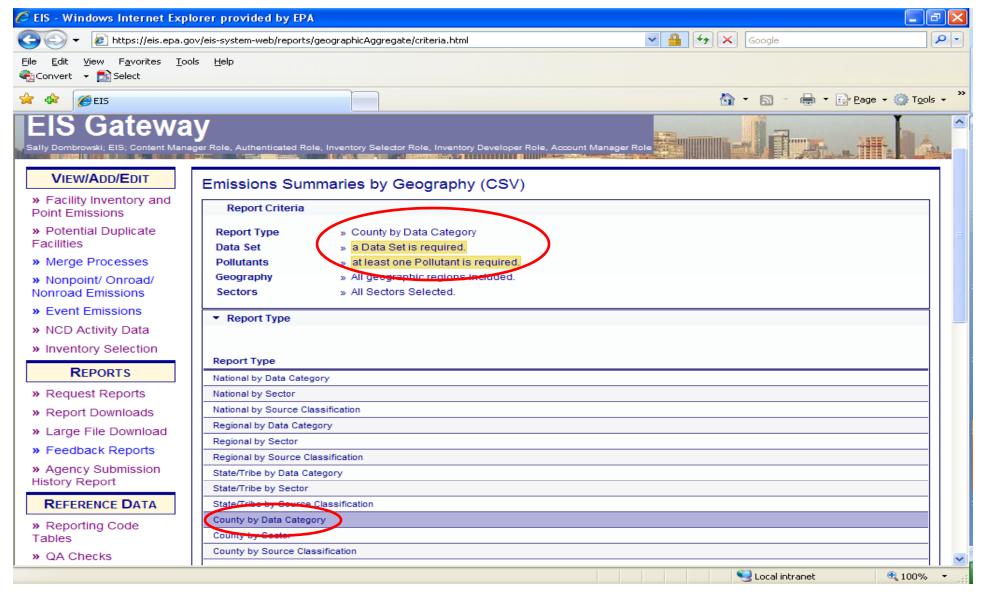

- EIS Facility ID
- EIS Unit ID
- EIS Process ID
- EIS Release Point ID
- Agency Facility ID
- Agency Unit ID
- Agency Process ID
- SLT Rel Pt ID
- Program System Code
- Process Rel Pt Apportionment
- Apportionment comment
- Rel Pt Latitude
- Rel Pt Longitude
- Coordinates Protected
- Coordinate Derivation
- Rel Pt Type
- Rel Pt Description

- Stack Ht
- Stack Ht Protected
- Stack Diameter
- Stack Diameter Protected
- Exit Gas Velocity
- Exit Gas Velocity Protected
- Exit Gas Flow Rate
- Exit Gas Flow Rate Protected
- Exit Gas Temperature
- Distance to Fence
- Fugitive Ht
- Fugitive Width
- Fugitive Length
- Fugitive Release Angle
- Rel Pt Status
- Rel Pt Status Year
- Rel Pt Comment

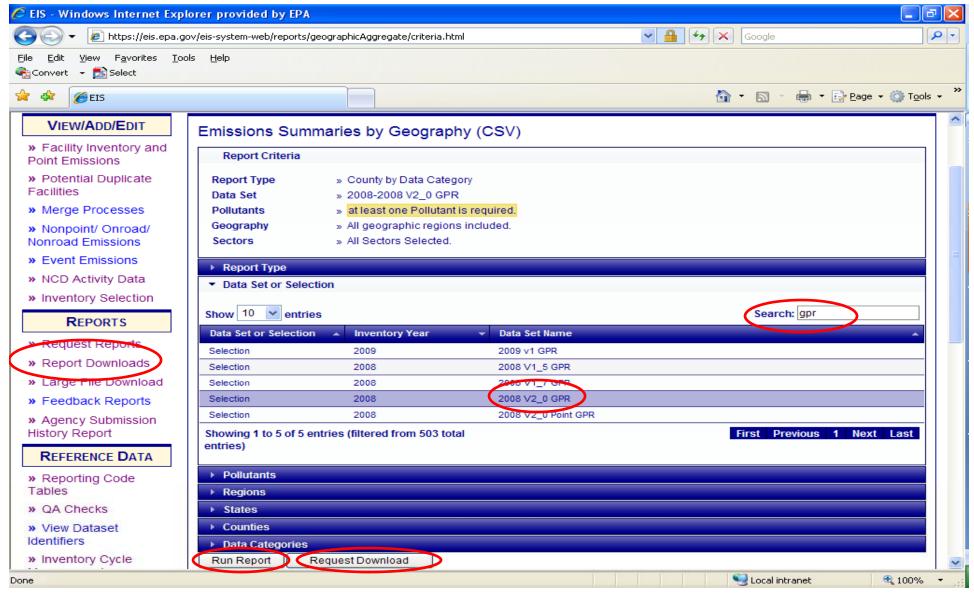

Emission Summary by Geography

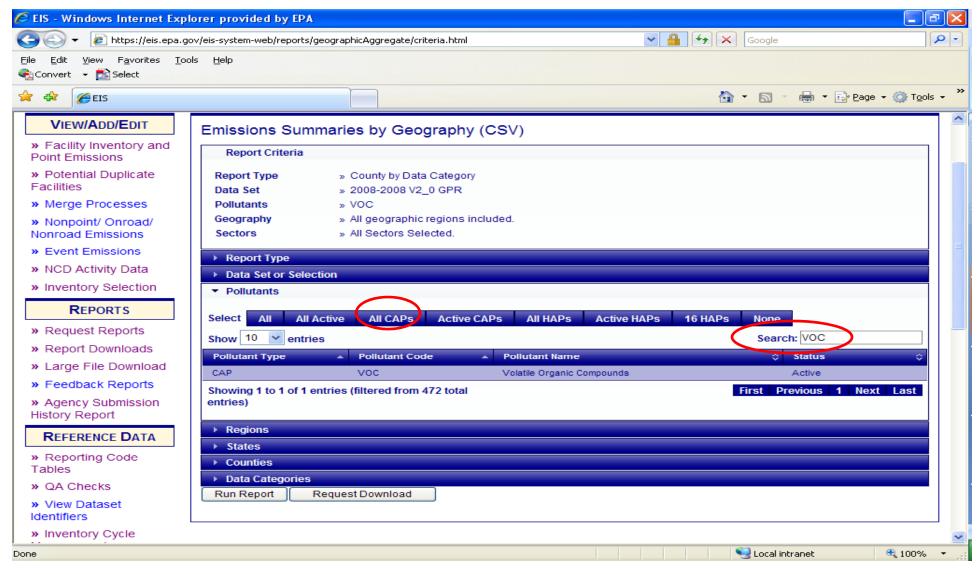

Emission Summary by Geography County by Data Category

Emissions Summary by Geography County by Data Category

Emissions Summary by Geography County by Data Category

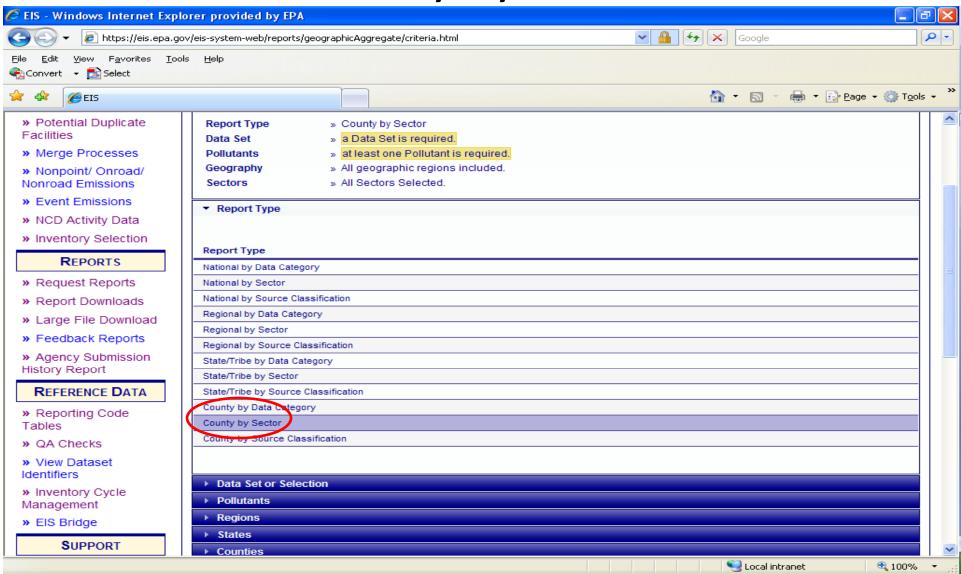

Emission Summary by Geography County/Tribe by Data Category – Data Fields

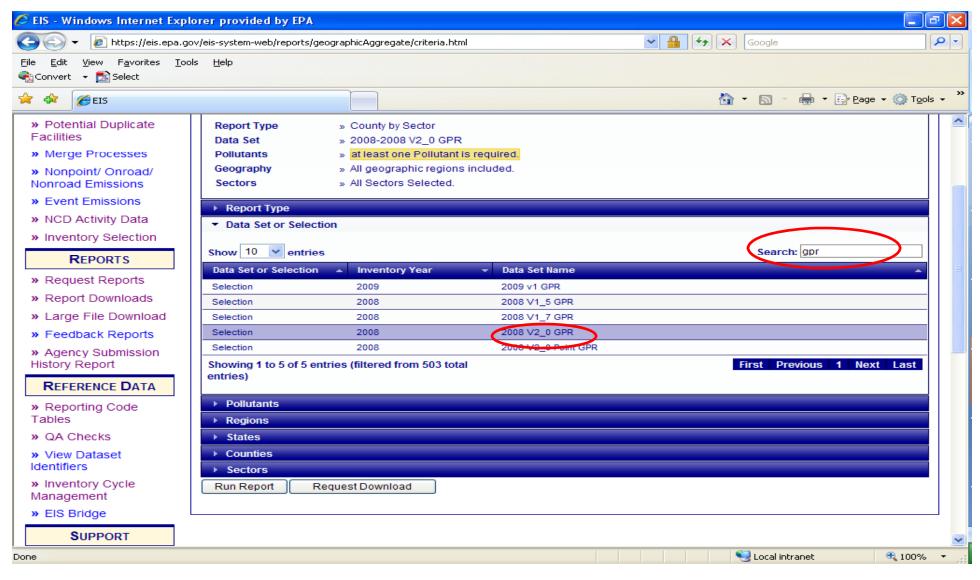

- FIPS
- State
- Tribal Code
- Tribal Name
- County
- Data Category

- Emission Operating Type
- Pollutant Code
- Pollutant Description
- Total Emissions
- UOM

County by SCC

Emissions Summary by Geography County by SCC

Emission Summary by Geography County/Tribe by SCC – Data Fields

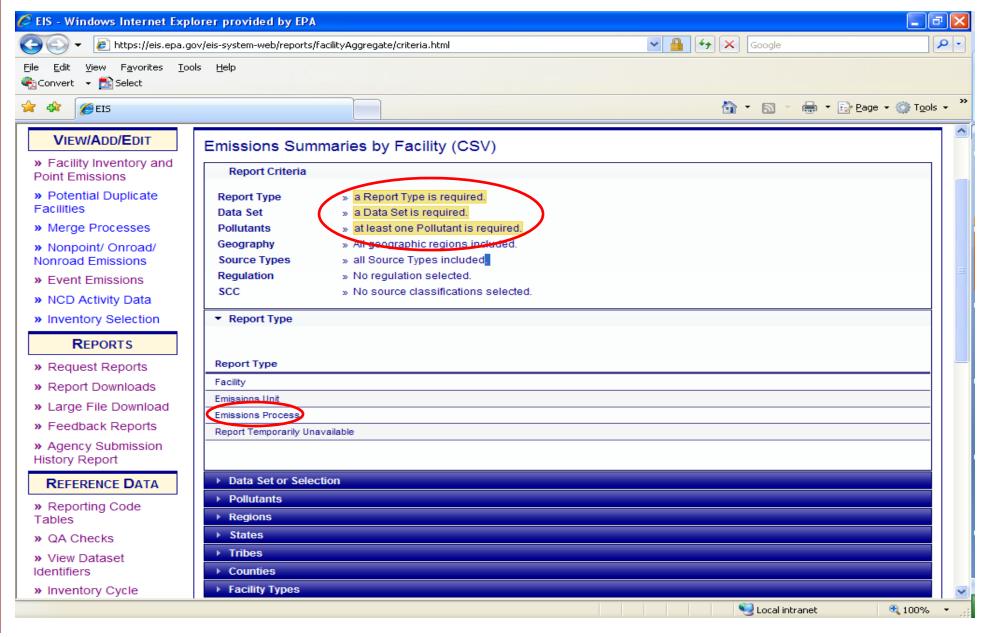

- FIPS
- State
- County
- Tribal Code
- Tribal Name
- Data Category
- SCC
- SCC Level 1
- SCC Level 2
- SCC Level 3
- SCC Level 4

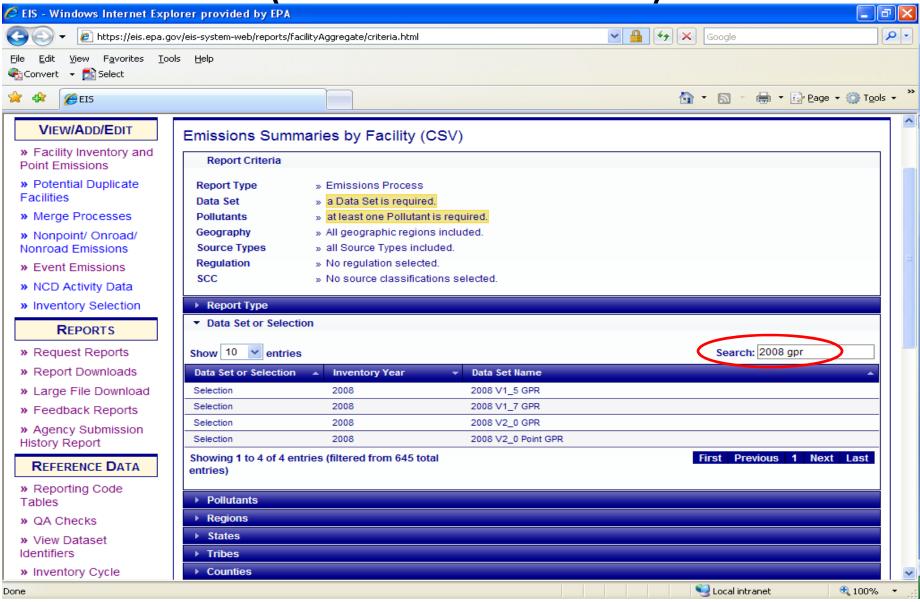

- Emission Type Code
- Aircraft Engine Type Code
- Aircraft Engine Type Description
- Emissions Operating Type
- Pollutant Code
- Pollutant Description
- Total Emissions
- UOM
- Data set

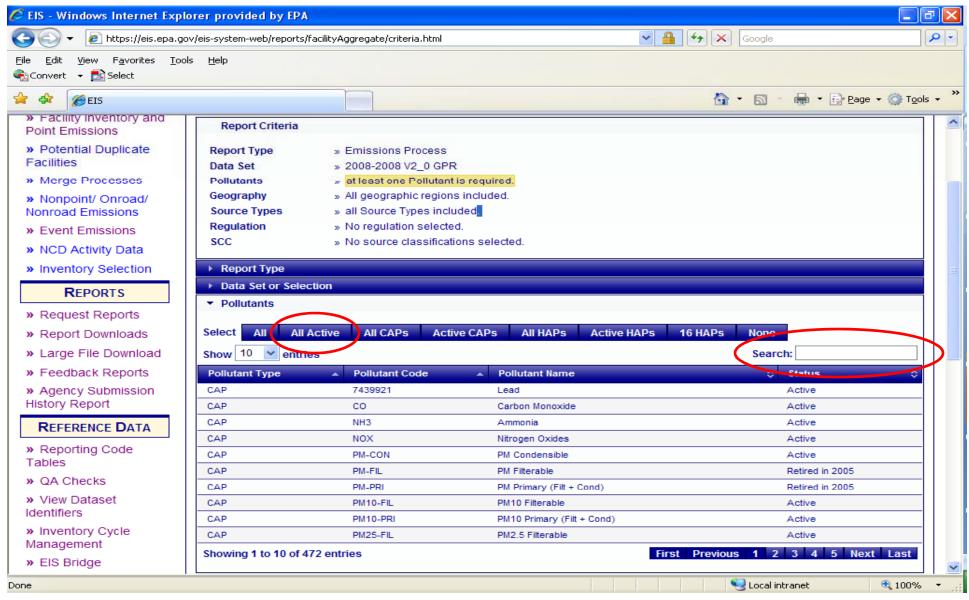

How can I use the Emission Summary by Facility/Geography Report?

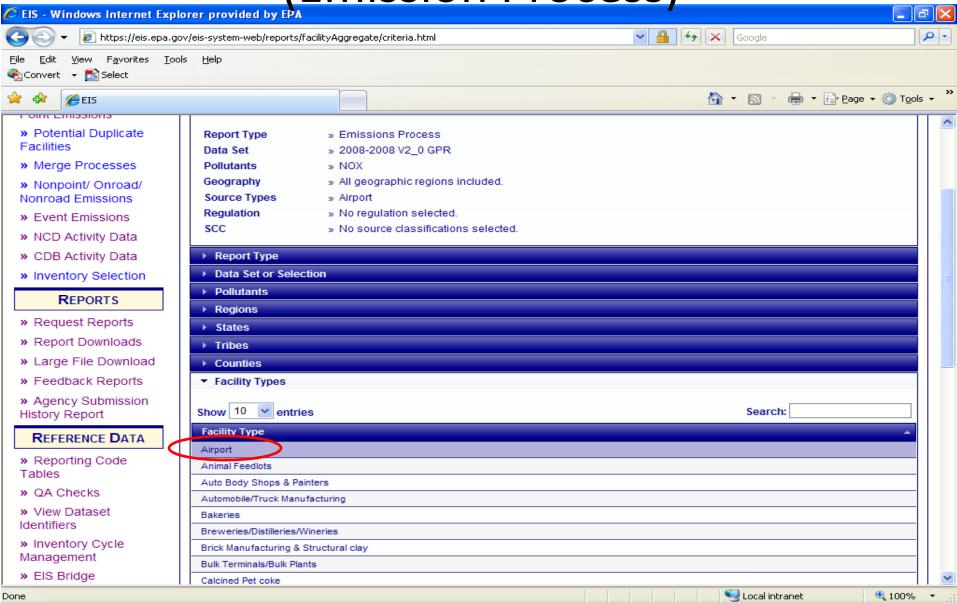

- Check EIS against your database
- Check process level emissions for a particular SCC
- Check unit level emissions against unit type.
- Where is a particular emission coming from
- Are most emissions stack or fugitive releases
- For the NEI, what EPA processes/pollutants were used and what are they

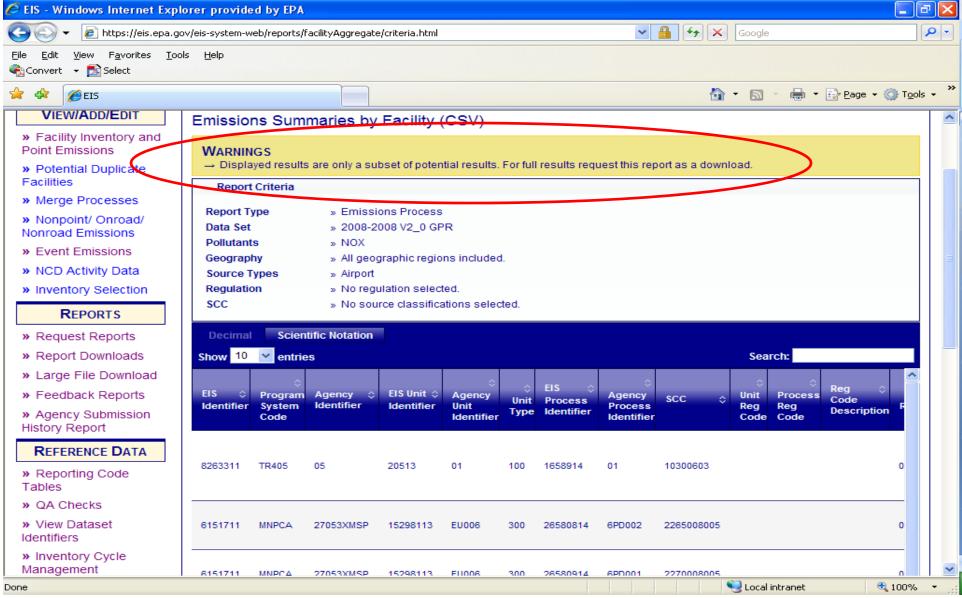

Emissions Summary by Facility

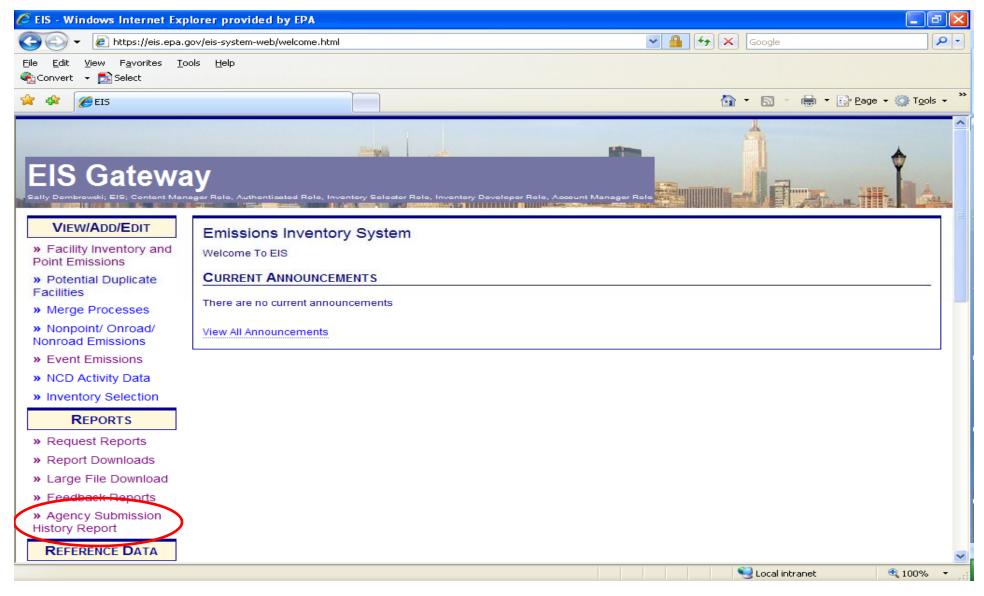

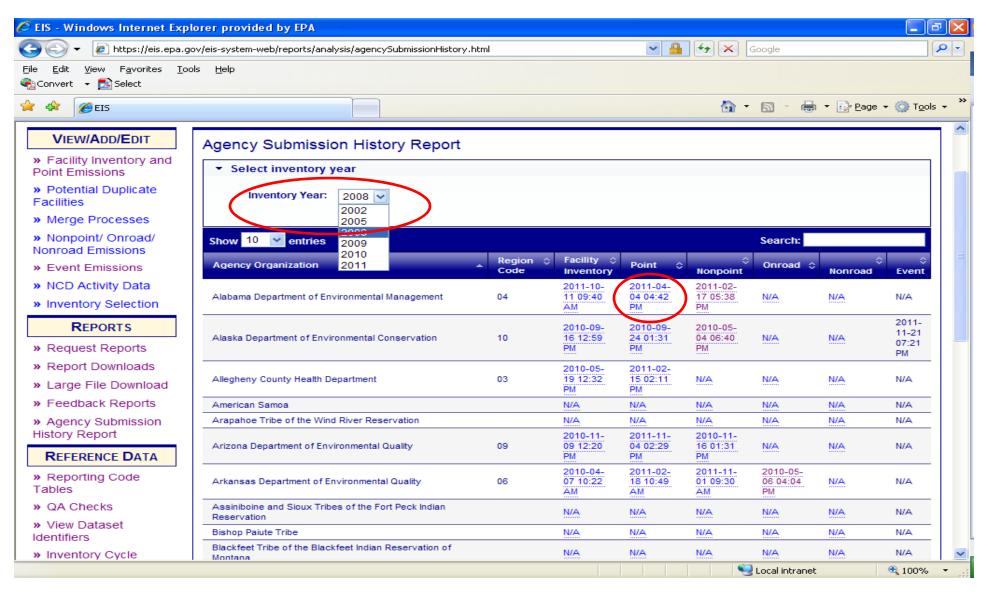

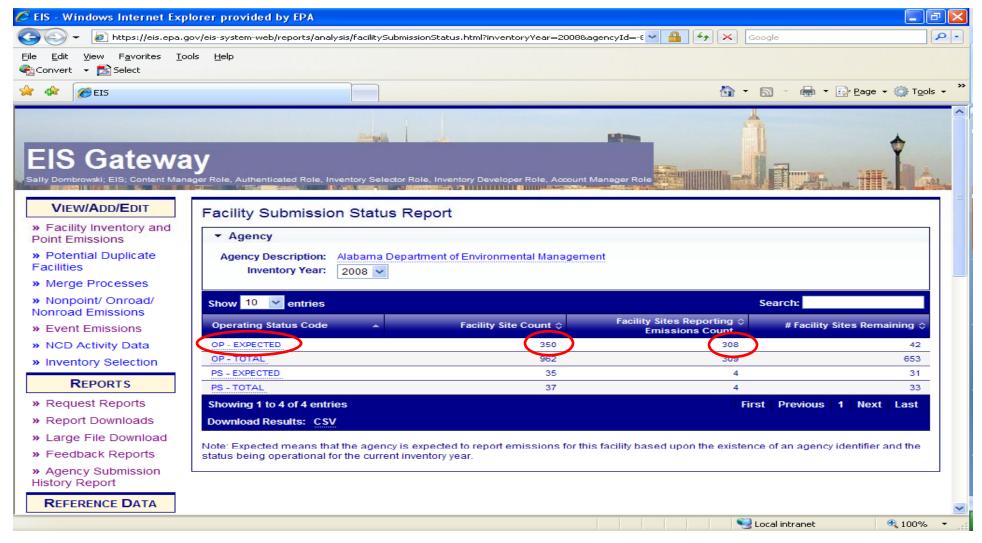

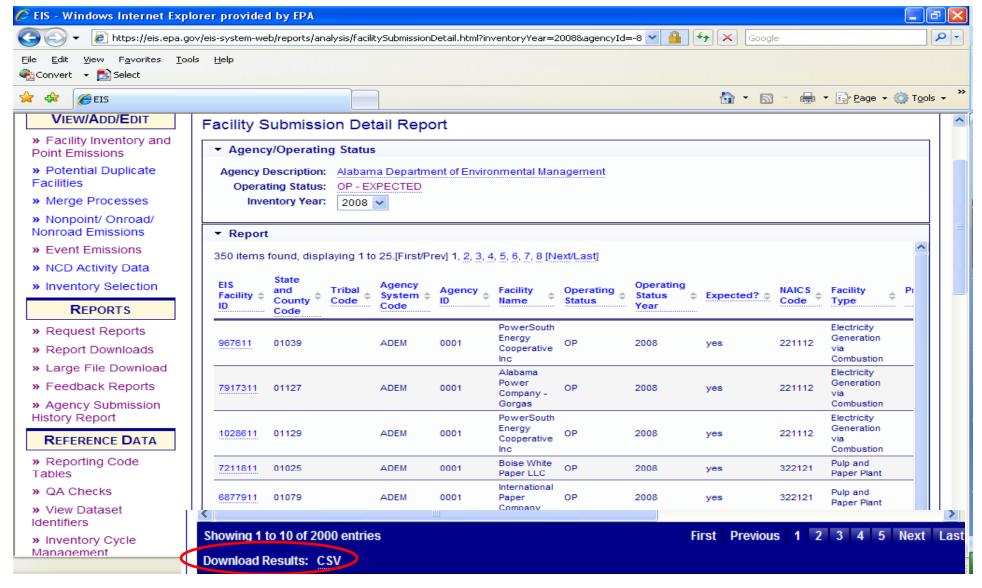

- EIS Identifier
- Program System Code
- Agency Identifier

- Percent Reduction Efficiency

Facility Configuration Report Regulation Level – Data Fields

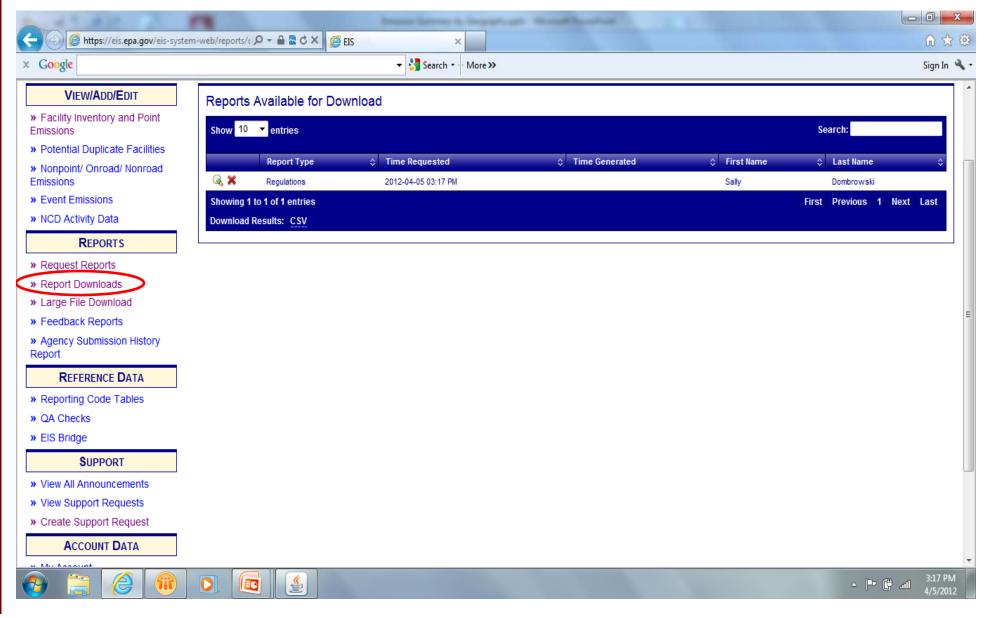

- EIS Facility ID
- SLT Facility ID
- EIS Unit ID
- SLT Unit ID
- EIS Process ID
- SLT Process ID
- Source Classification Code
- SCC Level One Description
- SCC Level Two Description
- SCC Level Three Description
- SCC Level Four Description

- Reg Applicability Level
- Reg Code
- Reg Code Type
- Reg Code Description
- Part Description
- Sub-Part Description
- SLT Reg Description
- Reg Protected?
- Applicability Start Year
- Regulation Comment
- Date Last Updated

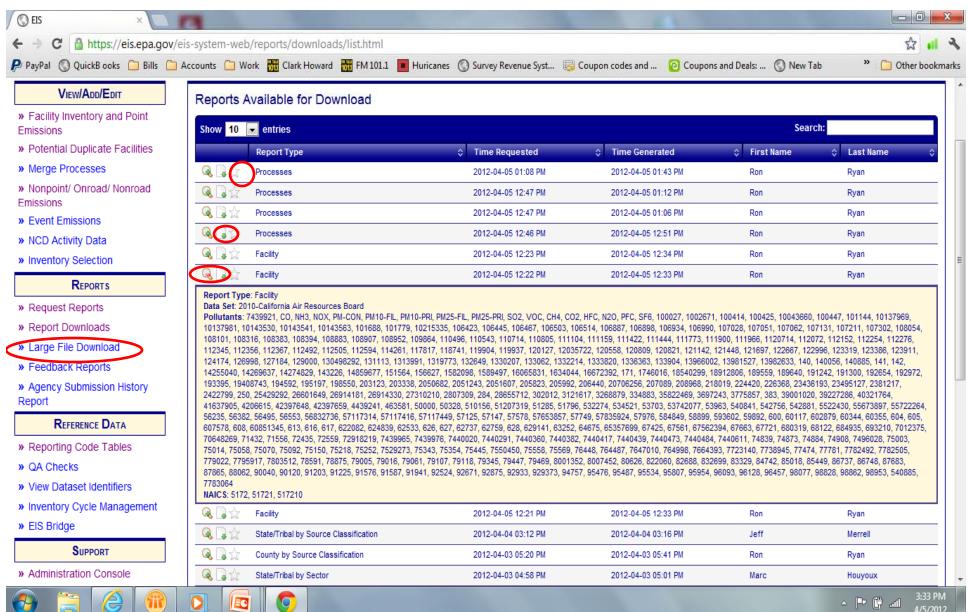

What can the Configuration Report be used for?

- Check to see if SCC is consistent between unit description/comment and process description/comment. Help to eliminate the use of 399999
- Tracking changes for facility which are expected to be covered by regulations.
- Check consistency across facility such as the Unit Type Code is the same as unit description

Report Download

Report Download

- Find what counties in my state, reported residential wood emissions in 2008
 - Emissions Summary by Geography
 - Select a Report Type of County by Sector
 - Select 2008 data set for your agency
 - Under Sectors filter use the Search box to find any Residential sectors using words such as "Residential" or "wood"
 - Select the Sector Fuel Comb-Residential-Wood
 - Request Download

- Do a comparison across inventory years.
 - Select an emission summary report at the level of interest (facility or geographic)
 - Select one a single data set (2008 Alabama Department of Environmental Management; or 2009 General Purpose Release; or 2008 EPA Onroad NCD20101201)
 - Select your pollutants of interest
 - Select Request Report
 - Repeat for each inventory year or dataset that you want to compare.
 - Use MS Access to link the tables and create your comparison.

- See all of the emission factors which were used in the 2008 nonpoint inventory.
 - Select Emissions Snapshot
 - Select inventory year data set such as 2008 North Carolina Department of Environmental and Natural Resources; or 2008 EIAG all in NP
 - Select Data Category = Nonpoint
 - Do this snapshot twice
 - Once for your agency
 - Second for EPA Augmented data
 - Use Access to link the reports together.

- Download the Event Inventory
 - Currently there are no reports which will allow you to download day specific data at this time.
 - Emissions Summary by Geography/County Level by SCC
 - 2008EPA Event_Summary data set
 - Pollutants of interest
 - Region, State or County of interest
 - Data Category = Event

Questions

 Send me scenarios of what you would like to pull out of EIS, and I will add them to the Q&A with instructions.
